SUMMARY

Software engineer with over 20 years of experience across various domains: backend systems, developer tools, functional programming, IDE extensions, and testing and build infrastructure. My current interest is agentic engineering: changing how teams deliver software in the age of AI.

My background is in backend engineering with statically typed languages, especially Scala and Rust, but I am open to new stacks and workflows. I care deeply about correctness, domain modeling, developer experience, compiler and IDE tooling, build systems, mentorship, and helping people become unstuck.

WORK EXPERIENCE

JAN 2025–MAY 2026
(1 year, 5 months)

Founding Engineer at EurekaLabs, Israel

First engineering hire, building infrastructure for Ethereum block construction. Led development of an Ethereum block builder written in Rust, spanning core product features and ongoing compatibility across network and protocol versions.

Introduced AI-first engineering practices for the team, including agentic workflows, prompt and skills management, orchestration, and multi-agent swarms.

APR 2020–MAR 2024
(4 years)

Founding Engineer and Tech Lead at Unit, Israel

Joined as Unit's first employee and helped grow the engineering organization from the ground up. Established core backend architecture, engineering practices, testing standards, protocols, and workflows.

Designed backend infrastructure including data access, wire formats, service architecture, domain models, and testing infrastructure. Built payment protocol integrations and backend services for ACH, wires, cards, APIs, and related financial workflows.

Created engineering guidelines, workshops, and hands-on material for Scala, ZIO, testing, and internal platform usage. Served as mentor and escalation point across teams for architecture, debugging, and production issues.

(abbreviated work history below, see LinkedIn for full details)

JUN 2016–AUG 2019
(3 years, 3 months)

Senior Software Engineer at Wix.com, Israel

Joined the build infrastructure team during the migration to the *Bazel* build system. Added Scala support, contributed fixes to the Google-maintained *Bazel IntelliJ* plugin, and created internal tools for Wix-specific build and IDE workflows.

JUL 2015–MAY 2016 (11 months)	Software Developer at Particular Software, Israel Built NServiceBus and Particular Platform products: distributed .NET messaging infrastructure and developer-facing APIs. <code>c#</code> <code>nservicebus</code> <code>.net</code>
JUL 2012–JAN 2015 (2 years, 7 months)	Lead Developer at OzCode (a CodeValue company), Israel Led development of a Visual Studio extension for debugging productivity, spanning core product work, feature research, technical content, and branding. <code>c#</code> <code>roslyn</code> <code>debugging-api</code> <code>visual-studio-extensions</code>
MAR 2010–NOV 2011 (1 year, 9 months)	Senior Software Developer at Typemock, Israel Developed unit testing products, mainly the isolation framework based on the un-managed <i>CLR Profiling API</i> , runtime inspection, and IL weaving. <code>c#</code> <code>.net-internals</code> <code>il-weaving</code> <code>aop</code>
OCT 2008–MAR 2010 (1 year, 6 months)	Software Developer at Eternix, Israel Lead developer of a WebDAV-based file server with encryption, versioning, quota, and user management features. <code>c#</code> <code>webdav</code> <code>winforms</code>
OCT 2007–OCT 2008 (1 year, 1 month)	Software Developer at InfoGin, Israel Created customer-specific mobile web applications in the professional services team. <code>c#</code> <code>asp.net</code> <code>mobile-web</code> <code>wap</code>
JUN 2005–SEP 2007 (2 years, 4 months)	Software Developer at PrizmaSoft, Israel Developed client applications for a business process management system and maintained build and deployment scripts. <code>c#</code> <code>winforms</code> <code>continuous-integration</code>

TECHNICAL PROFILE

LANGUAGES:	Scala, Rust, Haskell, TypeScript, C#, Java
LIBRARIES:	ZIO, TypeLevel, Tokio, Effect.ts
PRACTICES:	Architecture (ES/CQRS, DDD), testing (TDD, PBT, E2E), AI agent workflows
TECHNOLOGIES:	Postgres, Redis, Docker, Kubernetes, Kafka, AWS

OPEN SOURCE AND PUBLICATIONS

PUBLICATIONS:	Category Theory for Programmers by Bartosz Milewski (PDF , hardcover book)
OPEN-SOURCE:	Contributor: TypeLevel, ZIO, IntelliJ IDEA, Zed

SELECTED TALKS

VIDEO:	The Business of Scala (Scala Matters Meetup @ HiBob, 2023) Everything you (didn't) want to know about implicits (Hebrew) (Unit Engineering, 2022) Zero to FP (Hebrew) (Underscore Meetup, 2018) Journey to Functional Programming (Wix Engineering, 2017)
