SUMMARY

I am a software engineer based in Israel with over 20 years of experience across various domains: backend systems, developer tools, functional programming, IDE extensions, testing and build infrastructure.

My current interest is agentic engineering: changing how teams deliver software in the age of AI.

My background is in backend engineering with statically typed languages, especially Scala and Rust, but I am open to new stacks, new workflows, and teams that are willing to rethink how software gets built.

WORK EXPERIENCE

(see LinkedIn for full details)

JAN 2025–MAY 2026
(1 year, 5 months)

Founding Engineer at EurekaLabs, Israel

Founding engineer on EurekaBuilder, led development of an Ethereum block builder written in Rust, from low-level core features to maintaining compatibility across network and protocol versions.

Introduced AI-first engineering practices to the team: agentic engineering, prompt and skills management, orchestration, and multi-agent swarms.

APR 2020–MAR 2024
(4 years)

Founding Engineer and Tech Lead at Unit, Israel

As the first employee at Unit, I helped build the engineering team from the ground up, and over the years held various responsibilities and positions across multiple teams.

Designed and created most of the core backend infrastructure, such as the data access and serialization layers, service architectures, domain models, testing infrastructure and more.

Implemented various payment protocols (ACH, Wires, Cards, etc.), APIs and corresponding services end-to-end.

Served as the primary resource for supporting and mentoring team members, troubleshooting issues, and developing educational materials and hands-on workshops, engineering guidelines and testing specifications.

(abbreviated work history below)

JUN 2016–AUG 2019
(3 years, 3 months)

Senior Software Engineer at Wix.com, Israel

Joined the build infrastructure team during the migration to the *Bazel* build system. Added Scala support, contributed fixes to the Google-maintained *Bazel IntelliJ plugin*, and created internal tools for Wix-specific build and IDE workflows.

JUL 2015–MAY 2016 (11 months)	Software Developer at Particular Software, Israel Built NServiceBus and Particular Platform products: distributed .NET messaging infrastructure and developer-facing APIs. c# nservicebus .net
JUL 2012–JAN 2015 (2 years, 7 months)	Lead Developer at OzCode (a CodeValue company), Israel Led development of a Visual Studio extension for debugging productivity, spanning core product work, feature research, technical content, and branding. c# roslyn debugging-api visual-studio-extensions
MAR 2010–NOV 2011 (1 year, 9 months)	Senior Software Developer at Typemock, Israel Developed unit testing products, mainly the isolation framework based on the unmanaged <i>CLR Profiling API</i> , runtime inspection, and IL weaving. c# .net-internals il-weaving aop
OCT 2008–MAR 2010 (1 year, 6 months)	Software Developer at Eternix, Israel Lead developer of a WebDAV-based file server with encryption, versioning, quota, and user management features. c# webdav winforms
OCT 2007–OCT 2008 (1 year, 1 month)	Software Developer at InfoGin, Israel Created customer-specific mobile web applications in the professional services team. c# asp.net mobile-web wap
JUN 2005–SEP 2007 (2 years, 4 months)	Software Developer at PrizmaSoft, Israel Developed client applications for a business process management system and maintained build and deployment scripts. c# winforms continuous-integration

TECHNICAL PROFILE

LANGUAGES:	Scala, Rust, Haskell, C#, Java, TypeScript
LIBRARIES:	ZIO, TypeLevel stacks, multithreaded systems (green/virtual threads, Tokio)
PRACTICES:	Architecture (ES/CQRS, DDD), Testing (TDD, PBT, E2E), DevEx (compiler/IDE plugins, SDKs)
TECHNOLOGIES:	Postgres, Redis, Docker, Kubernetes, Kafka, AWS, JVM internals

OPEN SOURCE AND PUBLICATIONS

PUBLICATIONS:	Category Theory for Programmers by Bartosz Milewski (PDF , hardcover book)
OPEN-SOURCE:	Contributor: TypeLevel, ZIO, IntelliJ IDEA, Zed

SELECTED TALKS

VIDEO:	The Business of Scala (Scala Matters Meetup @ HiBob, 2023) Everything you (didn't) want to know about implicits (Hebrew) (Unit Engineering, 2022) Zero to FP (Hebrew) (Underscore Meetup, 2018) Journey to Functional Programming (Wix Engineering, 2017)
